

CRANE SCHEDULE PLANNING

Airline revenue depends on schedule planning and needs a solution to utilize aircraft, boost connectivity and manage irregularities.

This challenges require a state of the art schedule planning solution.

Overview

Crane SP is an advanced schedule management solution that enables airlines to achieve the best possible commercial planning. It has been implemented with many airlines and addresses their most demanding needs. Crane SP enhances schedule management operations with alternative display methods and is compliant with industry standards allowing full integration with airlines and their partners.

used by
airlines
with 80+
aircraft

Benefits

Improved Revenue

Crane SP manages connectivity by providing tools that analyze passenger connection rates. Real-Time and Complete Feasibility Check options point out issues and infeasibilities on aircraft availability, rotation discontinuity, station constraints and many other details.

Competitive Power

Airlines can easily compare their schedules with that of the competitors and run what-if scenario analysis. This allows airlines to test, learn and improve their schedules by keeping track of competitors.

User Experience

Color coding and tagging function contributes to Crane SP's enhanced user experience. Users can configure their dashboards on their own. Automatic warning and assistance mechanisms decrease error rates while making the overall process more efficient for users.

Integration

Crane SP has extensive integration capability. Most advanced Crew Planning, Central Reservation and many other solutions can be integrated with Crane SP. This introduces more effective support for all decision makers and other commercial departments.
