

CRANE COST ACCOUNTING

The cost structure of an airline is vast and exhaustive. Maximum throughput can only be achieved with a fast and accurate cost accounting solution to track, record and manage the costs.

Overview

Crane CA is a cost accounting solution providing end-to-end oversight of the operating costs, near real-time profitability calculation, cost and budget management with seamless schedule planning, revenue accounting and crew management systems integration.

Crane CA generates the operating costs with revenue figures collected from revenue accounting systems and retrieves operating costs from actual, contract and allocated prices with near real-time efficiency and industry standard level of accuracy. The Crane CA's powerful data processing and profitability calculation output is provided along with flexible and dynamic tools for cost control, world-class budget planning and accounting.

Benefits

Improved Revenue

Crane CA's contribution to profit is indisputable; not only preventing invoice overpayment but also providing more efficient cost control operation through use of workforce. Additionally, invaluable financial management reporting support and operations by Crane CA help improve the overall business processes.

Full Grasp of Contracts and Providers

Covering all types of contracts including complex and scenario-based, Crane CA provides detailed analysis of service rate information and manages, controls and renegotiates them. All contracts and rates definitions can also be managed in a single glance.

Accurate Financial Management

By accurately calculating flight-related costs based on actual operational data and supplier contracts at the time of flights, Crane CA generates accruals and posts figures to accounting systems. This helps financial management to revise or update planning, forecasting and budgeting processes on time.

Increased Planning and Forecast Efficiency

Real time cost figure reporting at flight, leg, route or reporting group levels enables detailed profitability analysis, budget planning, forecasting or simulation even in the individual flights.
